BLACKSPL5C.1 5.25" 13cm 40hm Component Speaker & Tweeter Kit 2x200w RMS Pair

World RRP: £87.95

Category: Coaxial & Component Speakers

Product code: BLACKSPL5C.1

Product description

Our BLACK series speakers are bursting with audiophile build specs. Large KSV voice coils and oversize magnets increases magnetic force. Cast Aluminium baskets with extensive cooling for the VC provides a significant reduction in power compression, this means they play louder for longer with more power. Power compression is often overlooked at the price of significantly reduced output when running at high power, due to increased resistance from heat build up in the motor assembly. This also affords the BLACK series speakers a much more open and natural sound. We made the suspension as light weight as possible to retain amazing cone control. This gives the midrange units high sensitivity enabling them to be high effective across a broad spectrum of power amplifiers. The tweeters use Neodymium magnets and ferrofluid cooling. This gives them a slimmer profile without loss of control. The domes are 100% pure silk with translucent finish which looks almost as good as it sounds! These are designed from the bottom up to impress even the most discerning ear. We are confident that these will surpass your expectations for even high end audio products. With more advanced crossover networks allowing for different tweeter positions with a tweeter dip switch. Giving you -3db 0db and +3db notches. We also revised the components so only the best quality components make up the crossover, affording them more power handling and better frequency control.

Version History

Version History Prototype - Overseas testing of the initial design during almost the whole of 2015 resulted in the final product being delivered in Q2 2016. V1 - Performance from the black series speakers is absolutely excellent and the entire range is capable of partnering up with any of our high quality SQ amplifiers to produce amazing results. We noted that the black on silver printing of the sticker on the back of the unit is vulnerable to damage very easily.

Key Facts

Product Category	Coaxial & Component Speakers
Version	1
Series	Black
First Added	42125

Impedance (Ohm) (Nominal)	4

Sensitivity (db/1Wm)	97
Total Magnet Weight (Oz)	8
Voice Coil Former Spec	Aluminum
Voice Coil Type	SV Type (200 Degree C)
Voice Coil Internal Diameter (mm)	26.4

System Power

Full System Power Handling RMS (Watts) (Using Pair/Full Set Of Speakers Not Necessarily Included & Appropriate Crossover)	400
---	-----

Technical Highlights

- Cast Aluminium Basket Reduces Mechanical Distortion
- Oversize 1.2" Voice Coil For High Power Handling
- High Power Crossover With Hi-Freq Attenuation Switch
- Extra VC Cooling Vents Decrease Power Compression
- Woven Black Fibre Cone Provides Superior Dynamics
- Large Single Roll Non Fatiguing Rubber Surround
- Rigid Large Dustcap Increases Cone Stiffness
- Large Clear Silk Dome Tweeter
- Sibilance Minimising Tweeter Protection
- Engineered For SQ OEM Location Install Use

What's In The Box?

- 2 x Midbass Speakers
- 2 x Tweeters
- 2 x Crossover
- 2 x Cable Kits
- 1 x Hardware Pack

**CLife CL10/4 10" 25cm 40hm 150w RMS Marine
Grade Waterproof Subwoofer**

World RRP: £44.95

Category: Waterproof Speakers

Product code: ClifeCL10/4

Product description

The Bassface Clife 10" subwoofer is quality built and will enhance any marine audio system. Rated to IP56 the white basket is constructed from tough ABS and is impervious to the elements. The sound is rich and warm with a musical tone. We have rated the subwoofer at a genuine and honest continuous 150W RMS which results in tremendous bass that will fill significant areas with high quality sound. The speaker can be run in a free air baffle situation, but works best in an enclosure of around 65 litres (2.3cuFt). This can be ported and tuned to a recommended 34Hz for amazing punch, or, if you prefer, a simple sealed box can be built. The speaker is supplied with a comprehensive datasheet with all technical parameters allowing other box design projects to be undertaken.

BFM.1 0.75 Amp 12/24 Volt Smart Battery Conditioner Charger

CONSUMER

World RRP: £41.95

Category: Consumer Electronics

Product code: BFM.1

Product description

Introducing the Bassface range of battery charger/conditioners. Packed full of developments and useful features such as fully automatic operation, long 10m cables, helpful storage bag that actually takes ALL the accessories so that you can throw the outer box away and still protect your investment and a choice of crocodial clips these are the intelligent choice. This version can charge both 6 and 12 volt batteries at a useful 750Ma. How many times have you had to use an extension lead in the workshop with a charger? Not any more. Can charge wet, mf, agm and gel batteries. On board logic handles diagnosis and recovery according to a logic program built in to the microprocessor. Comprehensive instructions are included, and we have tested these units extensively over a 12 month period in real world use before mass production. They are high quality, reliable and excellent value for money and perfect for set and forget operation for all those tucked away classic and sportscars and bikes!

Version History

Version History Initial prototype units brought to the UK in early 2018, with testing throughout the development phase. Many changes to the ancilliaries made during that time and careful attention to include sensible storage for all parts once the cardboard packing has been disposed of. Arrived to market early Q3 2019.

Technical Highlights

- 6/12 Volt Intelligent Battery Maintenance Charger
- Set And Forget Operation
- 100-240v AC Input
- 750mA Output Charging
- Suitable for WET, MF, AGM and Gel Batteries
- 10 Meter 240v Mains Power Lead
- Includes both Light and Heavy Duty Crocodile Clips
- Handy Carry Case Included
- IP65 Rating

What's In The Box?

- 1 x Battery Charger
- 1 x Storage Bag
- 2 x Heavy Duty Crocodile Clips
- 2 x Small Crocodile Clips
- 1 x Fixed Ring Terminal Connector

PRCAYM.1 Twin Core Pure OFC Twist RCA Audio Y Lead Splitter 1M 2F

World RRP: £7.95

Category: Wiring Products

Product code: PRCAYM.1

Product description

Our PRCA.1 cables and interconnects feature 2 twisted pair cores of 10x0.12mm Pure OFC copper and the same very flexible insulation found across the wiring range. This approach offers a great balance between sound quality and interference rejection in the harsh mobile environment. Custom tooled slimline lightweight RCA connectors with gold plate finish offer good clamping force and great conductivity.

Version History

Version History Note that the last batch of these is labelled incorrectly as PRCAZF.1

**PBTN.1 Car Battery Negative Terminal 1x0AWG
1x4AWG 2x8AWG Inputs**

World RRP: £12.95

Category: Wiring Products

Product code: PBTN.1

Product description

Our battery terminals offer you a elegant and high quality connection for either under bonnet or secondary battery connections. Featuring 1 x 0 AWG (8.25mm) , 1 x 4 AWG (5.19mm) and 2 x 8 AWG (3.26mm) connections and gold plated screws for great power conductivity. We opted for a screw down type wire clamping because these are easier to use and a little more versatile than compression type fittings.

GT Audio GT-C2 16v 2 Farad Power Stiffening Capacitor With Digital Display & Auto Shutoff

World RRP: £46.95

Category: ACCESSORIES

Product code: GT-C2

Product description

Designed to add stability to the power supply in demanding applications, our neat 6 Farad capacitor features a clear digital voltage readout. The product ships with mounting hardware to make installation simple. Adding a capacitor to your system will improve the bass response significantly, as well as tightening up the midbass performance and helping to minimise system distortion. Also, adding a cap will minimise the effects of bass on other vehicle functions such as lighting. (Note that this capacitor is not suitable for use in 24v nominal applications such as commercial vehicles)

GT Audio GT-C6 16v 6 Farad Power Stiffening Capacitor With Digital Display & Auto Shutoff

World RRP: £73.95

Category: ACCESSORIES

Product code: GT-C6

Product description

Designed to add stability to the power supply in demanding applications, our neat 6 Farad capacitor features a clear digital voltage readout. The product ships with mounting hardware to make installation simple. Adding a capacitor to your system will improve the bass response significantly, as well as tightening up the midbass performance and helping to minimise system distortion. Also, adding a cap will minimise the effects of bass on other vehicle functions such as lighting. (Note that this capacitor is not suitable for use in 24v nominal applications such as commercial vehicles)

Key Facts

Product Category	Accessories
Version	1
Series	GT Audio
First Added	44896
Last Modified	45303
Barcode	5060905111152
Production Status	Current
Product Net Weight (g) (For Pairs/Sets/Major Parts)	1500
Product Height (mm)	85
Product Length (mm)	265
Product Width (mm)	85
Complete Product Pack Weight (g)	1700
Operating Temperature (Degrees Celsius)	0-50
Warranty (Months) - Private Enjoyment Use Only	12
Sold As	Single

Technical Highlights

- Auto Shutoff If Inactive (Approx 2 Min)
- 6 Farad Capacity 16v Stable with 24V DC Surge
- Super Low ESR for Fast Charge/Discharge
- Integrated Digital DC Voltmeter
- Chromed Connectors & Mounting Straps Included
- See-Thru Top Exposing Components

GT Audio GT-100/x4AB Class AB 4/3/2 Channel Full Range Amplifier 400w

World RRP: £116.95

Category: AMPLIFIERS

Product code: GT-100/x4AB

Product description

GT Audio offers a very high level of performance with a relentless eye to offering the best possible value for money. These GT amplifiers are a traditional Class AB product, offering outstanding sound quality in return for conventional form factor. Features of note are a very useful crossover section that has the ability to cross over the HPF all the way up to 3k which is very helpful for running 3 way style speaker kits, and an input section happy to deal with a 6.5V line input. The amplifier is happy to operate in bridged configuration as either a 2 channel or tri-mode setup but, as ever, care must always be taken to observe minimum impedance requirements in system design for reliable and high performance.

GT Audio GT-1100/x1D Class D Monoblock Subwoofer Amplifier 1100w RMS

World RRP: £134.95

Category: AMPLIFIERS

Product code: GT-1100/x1D

Product description

GT Audio offers a very high level of performance with a relentless eye to offering the best possible value for money. These GT amplifiers are a modern Class D design that offers the absolute most performance possible to drive your subwoofer for the cost point. An adjustable low pass crossover is built in, alongside the essential subsonic filter to ensure optimal use of power. The GT Class D amplifiers are 1 Ohm capable and produce their maximum power into this load.

Version History

Version History Since 7/8/23 the downloadable data sheet and online data matches the screen printing on the amplifier for LPF and subsonic filter. There are detail but not significant differences between the lab report (and hence the paper data sheet included with the amplifier in the box in relation to these 2 fields.)

**GT Audio GT-90/x5ABD Class AB/D Hybrid 5/3
Channel Full Range+Subwoofer Amplifier 1360w
RMS**

World RRP: £249.95

Category: AMPLIFIERS

Product code: GT-90/x5ABD

Product description

GT Audio offers a very high level of performance with a relentless eye to offering the best possible value for money. The GT90/x5ABD is a super exciting, whole system amplifier that combines a traditional Class AB 4 Channel board to drive full range with a Class D mono section to drive your subwoofer. It is a fantastic solution to keeping an upgraded system simple and light on extra wiring. Notably, the subwoofer section is happy to play into a 1 Ohm load, where it offers almost 1000w of power! A full crossover section for both sides of the amplifier is on board, allowing a range of useful configurations.

Version History

Version History Since 7/8/23 the downloadable data sheet and online data matches the screen printing on the amplifier for LPF. There are detail but not significant differences between the lab report (and hence the paper data sheet included with the amplifier in the box in relation to this field.)

**GT Audio GT-MR6/4 6.5" 16.5cm 40hm 80w RMS
High SPL Component Midrange Speaker**

World RRP: £26.95

Category: Midbass & Midrange Speakers

Product code: GT-MR6/4

Product description

The GT Audio MR Series drivers are designed for use both in car and in studio or PA environments. They feature high sensitivity with pressed paper cones and powerful magnets for outstanding detail in their sound reproduction. It is possible to use the speaker to perform duties on a wide frequency range either as a mid range or full range unit. Of course, their bass performance rolls off significantly but the exchange is worth it for the huge midrange punch. They feature copper shorting rings for improved impedance profile. The speakers offer simply astonishing performance on and off axis, and are ridiculously good for the price point. They also work well with modest power inputs, and of course will tolerate significant burst energy.

Version History

Version History The GT MR woofers are an exact reproduction of the popular Bassface PAW series of woofers that were available upto 2020.

**GT Audio GT-SW6/4 6.5" 16.5cm 2x40hm DVC
Subwoofer 75w RMS (Sealed/Ported
Enclosures/Free Air)**

World RRP: £22.95

Category: SUBWOOFERS

Product code: GT-SW6/4

Product description

High quality dual voice coil subwoofer offering performance without excessive cost. Lightweight construction for efficient performance even when powered from modest amplifiers. Extremely musical bass, by virtue of the complete lack of mass. As a subwoofer is made more and more powerful the heavier and heavier resultant cone and motor weight blunts the musicality, creating the familiar one note bass that we seem to be used to today. The GT-SW range is a breath of fresh air and delivers back that exciting, hard, driving sound. Unbeatable bass performance at the price point.

Version History

Version History Developed over an extended period and brought to market Q3 2023 for the launch of the GT Model range.

**GT Audio GT-SW8/4 8" 20cm 2x40hm DVC
Subwoofer 100w RMS (Sealed/Ported
Enclosures/Free Air)**

World RRP: £30.95

Category: SUBWOOFERS

Product code: GT-SW8/4

Product description

High quality dual voice coil subwoofer offering performance without excessive cost. Lightweight construction for efficient performance even when powered from modest amplifiers. Extremely musical bass, by virtue of the complete lack of mass. As a subwoofer is made more and more powerful the heavier and heavier resultant cone and motor weight blunts the musicality, creating the familiar one note bass that we seem to be used to today. The GT-SW range is a breath of fresh air and delivers back that exciting, hard, driving sound. Unbeatable bass performance at the price point.

Version History

Version History Developed over an extended period and brought to market Q3 2023 for the launch of the GT Model range.

GT Audio GT-TW/1 40hm 2x120w RMS Bullet Type Compression Tweeters (Pair)

World RRP: £28.95

Category: Tweeters & Horns

Product code: GT-TW/1

Product description

This high performance tweeter pair gives great performance from modest levels of input, and offers an impressively flat response all the way across its usable range, with a gentle roll off. For the type of tweeter, the sound is balanced and listenable even on quiet and relaxed passages. Of course, on high energy music the TW/1 rocks, as you'd expect!

**GT Audio GT-SPL6.2B 40hm 2x75w RMS Marine
Grade Waterproof Full Range Speakers (Black)
Pair**

World RRP: £29.95

Category: Waterproof Speakers

Product code: GT-SPL6.2B

Product description

This Marine Ready speaker system is an all round top performer featuring one piece waterproof dual concentric cones to cover the full frequency spectrum from sparkling highs to rounded midrange. The speakers are lightweight and waterproof, with no risk of rust with the strong ABS basket. Perfect for in-wall cabin fitment on boats or ceiling fitment in high moisture environments such as bathrooms and kitchens. Simple and attractive lines in the aesthetics make these easy to match to almost all interiors and no branding is printed on the presentation side of the speaker, for the cleanest possible look. Shallow mounting depth gives the flexibility for installation in tight spaces. Waterproof, durable, slim fit full range speakers. Perfect for boats, yachts, bathrooms and hot tubs!

Version History

Version History This product is a re-launch of the original and successful Bassface SPL Marine range that was discontinued in 2020. Detail changes have been made to optimise the performance.

**GT Audio GT-BX24B 40hm 2x50w RMS 3-Way
Weatherproof Outdoor Box Speakers (Black) Pair**

World RRP: £32.95

Category: Waterproof Speakers

Product code: GT-BX24B

Product description

Excellent for use on boats, marine, decks, poolside or other outdoor applications. With special aluminium grilles which are highly corrosion resistant. The speakers are weatherproof and feature a 3.5 inch aluminium injection cone woofer with a 24 Oz magnet. The 1.75" wide dispersion midrange offers outstanding vocal performance. The bass response is optimised via the bass reflex vent, and the speakers have an excellent frequency response, from 70Hz to 21Khz. Quick connect speaker terminals and adjustable mounting brackets facilitate fast installation. Note that these speakers are a passive design and must be connected to an external amplifier.

Version History

Version History This product is a relaunch of our successful Bassface SPLBOX.1 that was available until 2020, but with some evolutionary improvements and additions to optimise performance.

**GT Audio GT-PK4 4AWG (18mm) 100A Mini-ANL
Fused Prewired & Crimped 5m Super Flexible
Amplifier Wiring Kit (9%OFC/1029 Strand)**

World RRP: £28.95

Category: Wiring Products

Product code: GT-PK4

Product description

GT Audio was conceived by Bassface to offer a very high level of performance with a relentless eye to offering the best possible value for money. The PK wiring kits are a CCA and OFC blended cableset with pre-fitted Mini ANL fuse holder with 100A fuse and connectors for the easiest and fastest installer experience possible. The kit includes quality 5m RCA cables with helpful right angle ends, as well as the usual ancilliary accessories and remote cables and 5m of speaker cable. The power cable is high quality, super flexible silicone jacket with high strand count conductors. These are not to be confused with those "cheap charlie" marketplace wiring kits that claim unfeasible wattages. We supply a fuse helpful for many installations but this can and should be replaced with a more appropriate value to your install if necessary with reference to our cable chart. This chart is provided so that you can understand how current and wattage capacity changes as you alter the power cable length. Never install a fuse that would exceed the current handling of the fuseholder.

GT Gear GTG-MP10 20W Battery Powered Compact Handheld Briefing Megaphone

World RRP: £16.95

Category: Consumer Electronics

Product code: GTG-MP10

Product description

Our mid sized MP10 megaphone offers twice the power of our tiny MP5 whilst still managing to be a usefully compact size at just 218mm in length. Excellent voice performance, ideal for larger indoor or outdoor briefings. The unit is small, allowing annunciation whilst not greatly blocking out the speaker visually which is very important in these situations. Fully certified for EU and UK use.

Key Facts

Product Category	Consumer Electronics
Version	1
Series	GT Gear
First Added	45089
Last Modified	45266
Barcode	5060905111398
Production Status	Current
Product Net Weight (g) (For Pairs/Sets/Major Parts)	480
Product Height (mm)	109
Product Length (mm)	218
Product Width (mm)	109
Complete Product Pack Weight (g)	530
Operating Temperature (Degrees Celsius)	0-50
Warranty (Months) - Private Enjoyment Use Only	12
Sold As	Single

Battery Data

Batteries Included?	No
---------------------	----

Technical Highlights

- CE Certified for EU/UK, Unlike Many USA Competitors
- Requires 4x 'C' Batteries
- Super Lightweight, Portable & Weatherproof Design

- Ideal For Larger Briefings and Outdoor Meetings
- Adjustable Volume Control & Siren Function
- Fabric Wrist Strap & Folding Handle

What's In The Box?

- 1 x Megaphone
- 1 x Wrist Strap
- 1 x Data Sheet

GT Gear GTG-MP15B 30W Battery Powered High Power Handheld Megaphone (Blue)

World RRP: £17.95

Category: Consumer Electronics

Product code: GTG-MP15B

Product description

The high performance MP15 megaphone is available in a range of colours and offers class leading performance from a mid sized unit. Ideal for use indoors or outdoors and for crowd control duties or demonstrations. Unit features adjustable volume, built in siren function and is fully certified for UK and EU use.

GT Gear GTG-MP5 10W Battery Powered Super Compact Handheld Briefing Megaphone

World RRP: £13.95

Category: Consumer Electronics

Product code: GTG-MP5

Product description

Our smallest megaphone is an extremely convenient, compact handy size, at just 160mm in length. Featuring a tactile rotary control for volume and a built in siren. The unit takes easily available and inexpensive AA cells. Excellent voice performance, ideal for indoor or small outdoor briefings. The unit is tiny and can be held between thumb and forefinger, allowing annunciation whilst not blocking out the speaker visually which is very important in these situations.

Indy DB1.1X 10hm Class D Monoblock Subwoofer Amplifier 500w RMS

Indy

World RRP: £121.95

Category: AMPLIFIERS

Product code: IndyDB1.1X

Product description

The DB series of amplifiers has been with us since our inception over a decade ago. It has undergone development over that time to present today as a reliable and great sounding way to add high performance amplification to your car without excessive cost. Firstly, it has terminals and connectors that you would associate with a more expensive unit, which along with the included (UK designed!) instructions makes installation easy and extends service life even when swapped between vehicles. Carefully designed and custom screen printed controls make setup easier and the amplifier comes printed with a host of helpful tips even on the chassis. Outstanding levels of power - over 500 watts of genuine performance - and great sound quality make this a compelling choice for anyone looking for a really nice quality monoblock at a great price.

Version History

Version History Following a visit to the production facility in 2019 a selection of new and improved circuit boards was made for these key models. The build process was long and difficult, stretching from Q3 2019 to delivery in Q3 2020. Our ever stricter QC, build and design needs made the process far longer than planned. We are very happy with the result, however, and these amplifiers replace the outgoing models with significant improvements. As a package, the vastly improved data and instructions will make installation and setup easier for the beginner.

Indy DB4.1X Class AB 4/3/2 Channel Full Range Amplifier 340w RMS

Indy

World RRP: £116.95

Category: AMPLIFIERS

Product code: IndyDB4.1X

Product description

The DB series of amplifiers has been with us since our inception over a decade ago. It has undergone development over that time to present today as a reliable and great sounding way to add high performance amplification to your car without excessive cost. Firstly, it has terminals and connectors that you would associate with a more expensive unit, which along with the included instructions makes installation easy and extends service life even when swapped between vehicles. Carefully designed and custom screen printed controls make setup easier and the amplifier comes printed with a host of helpful tips even on the chassis. The 4.1 returns to do battle with a hugely improved crossover section and an even more tank like build! Sound quality is excellent and with high level inputs and the ability to run modest subwoofers or stereo loads - even simultaneously - this is the go-to amp for best value and performance in this category.

Version History

Version History Following a visit to the production facility in 2019 a selection of new and improved circuit boards was made for these key models. The build process was long and difficult, stretching from Q3 2019 to delivery in Q3 2020. Our ever stricter QC, build and design needs made the process far longer than planned. We are very happy with the result, however, and these amplifiers replace the outgoing models with significant improvements. **Indy CP4 4" 10cm 40hm Component/Coaxial
Midrange & Tweeter System 2x60w RMS Pair**

Indy

World RRP: £106.95

Category: Coaxial & Component Speakers

Product code: IndyCP4

Product description

Indy CP is our top of the range modular all purpose full range speaker system. The multi-piece magnet delivers punchy midbass and the beautifully integrated tweeter offers smooth vocal performance right to the edge of the frequency range, through the carefully matched crossover network. The speakers can be used from a head unit if a relaxed and mellow sound is the goal and a modest sound level is acceptable, but the real excitement happens when a powerful external amplifier is used, when the speakers take on a different character and offer a punchy, powerful, much more exciting sound. Installation can be completed using the system as either as a component or a coaxial installation using the supplied hardware kit.

**Indy CX4 4" 10cm 40hm Component/Coaxial
Midrange & Tweeter System 2x40w RMS Pair**

Indy

World RRP: £56.95

Category: Coaxial & Component Speakers

Product code: IndyCX4

Product description

Indy CX is the answer to a high performance upgrade of full range speakers with a high degree of versatility of installation. This system can be fitted as either a traditional component set or as a coaxial. The package includes all the necessary hardware to do this, along with a simple crossover that is matched to the impedance curve of the speaker to give a smooth and pleasing response. Every aspect of the sonic performance of these speakers was scrutinised to deliver the absolute best balance of sound quality and power handling for the intended purpose.

Overall Depth (mm)	25
Mounting Depth (mm)	17

Front Protrusion From Mounting Plane (mm)	8
Overall Diameter (mm)	46
Magnet Diameter (mm)	19.5
Installation Cut-out Diameter (mm)	40
Magnet Weight (Oz)	0.25
Magnet Type	NdFeB-N38
System RMS (Watts) (Single Tweeter, 4Khz/12DB Oct X Over)	40
Frequency Response (Hz)	1500>20000
Impedance (Ohm)	4
Sensitivity (db/1Wm)	92

Speaker Data

Continuous RMS Power (Watts) (One Speaker, Using Appropriate Crossover & 0%THD)	40
Impedance (Ohm) (Nominal)	4
Sensitivity (db/1Wm)	87
Total Magnet Weight (Oz)	6.5
Optimum Bass Enclosure Type	IB
Voice Coil Former Spec	Kapton
Voice Coil Type	SV Type (200 Degree C)
Voice Coil External Diameter (mm)	25.7
Voice Coil Internal Diameter (mm)	25.5
Voice Coil Winding Height (mm)	9
Voice Coil Winding (Layers)	2
Cone Type	Injection PP
Spider Compliance	0.5
Spider Type	Progressive

Spider Diameter (mm)	115
Spider Design	Single
Surround	Rubber
Surround Material	Rubber
Tinsel Wire	High Temperature
Terminal	Screw type

System Power

Full System Power Handling RMS (Watts) (Using Pair/Full Set Of Speakers Not Necessarily Included & Appropriate Crossover)	160
---	-----

Technical Highlights

- 2x40w RMS Continous Power Handling, 4 Ohm System
- Coaxial Or Component Installation (Crossover Included)
- 1" Kapton Woofer VC, Progressive Spider Pack
- Custom Injection PP Woofer Cone, Nitrile Surround
- Powerful Y30 Woofer & N38 Neodymium Tweeter Magnet
- Extremely Musical Silk Tweeter, 2 Layer ASV Coil

What's In The Box?

- 2 x Midrange Speakers
- 2 x Modular Tweeters
- 2 x Crossovers
- 1 x Bassface Sticker
- 1 x Hardware & Instruction Pack

**Indy CX5 5.25" 13cm 40hm Component/Coaxial
Midrange & Tweeter System 2x60w RMS Pair**

Indy

World RRP: £59.95

Category: Coaxial & Component Speakers

Product code: IndyCX5

Product description

Indy CX is the answer to a high performance upgrade of full range speakers with a high degree of versatility of installation. This system can be fitted as either a traditional component set or as a coaxial. The package includes all the necessary hardware to do this, along with a simple crossover that is matched to the impedance curve of the speaker to give a smooth and pleasing response. Every aspect of the sonic performance of these speakers was scrutinised to deliver the absolute best balance of sound quality and power handling for the intended purpose.

**Indy XM10/4 10" 25cm 40hm 320w RMS
Professional High SPL Component Midrange
Speaker**

Indy

World RRP: £90.95

Category: Midbass & Midrange Speakers

Product code: IndyXM10/4

Product description

High quality midrange/midbass speaker with many top class features. The ultra-lightweight copper coated coil allows for a musical and accurate sound with the integrated Faraday ring on the VC to smooth the response. Indy XM also features a dual roll treated cloth surround, a coated dimpled textured surface to the cone that acts to increase the effective piston area to move more air and a CNC machined bullet phase plug to further hone response. These are great for small or large door builds in car. If the speaker is installed in an enclosure we advise a sealed setup to avoid the excursion peak that affects ported enclosures. Indy XM offers tremendous bandwidth, musicality and surprisingly good mid bass performance. It also has excellent detailed documentation making it easy to set up and use.

Version History

Version History The Indy XM branding was originally conceived in mid-2019, with outline specifications in place by the end of that year. Prototypes were built throughout 2020 and first production models were made available Q3 2021

Product Height (mm)	140
Product Length (mm)	230
Product Width (mm)	230
Complete Product Pack Weight (g)	1200
Operating Temperature (Degrees Celsius)	0-50
Warranty (Months) - Private Enjoyment Use Only	12
Sold As	Kit

Speaker Data

Overall Diameter (mm)	215
Impedance (Ohm) (Nominal)	2+2
Voice Coil Former Spec	Aluminium

Voice Coil Type	CCA Flat Wire
Voice Coil External Diameter (mm)	54.8
Voice Coil Internal Diameter (mm)	50.8
Voice Coil Winding Height (mm)	28
Voice Coil Winding (Layers)	8
Cone Type	Non Pressed Paper
Spider Compliance	Medium
Spider Type	Progressive
Spider Diameter (mm)	110
Spider Design	1x2
Surround	Tall Smooth
Surround Material	Foam
Tinsel Wire	Double Round Wire Stitched

Technical Highlights

- Provision of replacement parts reduces system running costs
- Replacing parts is more environmentally friendly
- Bassface is committed to product support

What's In The Box?

- 1 x Recone Kit

Indy M6/4RK 6" 40hm 17cm Midrange Recone Kit

Indy

World RRP: £16.95

Category: Spare Parts

Product code: IndyM6/4RK

Product description

This recone kit is supplied in a sturdy packaging box and is ready to fit with the necessary alignment tools included. It does not include adhesive. We recommend use of a rubberised CA glue to perform the installation.

**Indy A8/4 8" 20cm 40hm Loud & Musical
Subwoofer 200w RMS (Sealed Enclosures)**

Indy

World RRP: £37.95

Category: SUBWOOFERS

Product code: IndyA8/4

Product description

The Indy A was designed to offer a great sounding subwoofer that be as easy to use as possible. Many prototypes were made and modified along with a tremendous amount of reliability testing undertaken to ensure outstanding longevity. Using custom designed coils and multiple spiders tuned to each exact size and model we were able to develop for excellent performance whilst providing as much protection as possible against beginner mistakes such as accidental distortion, over driving and non-optimal box design. The motor venting has been carefully designed to offer the best balance between noise reduction and cooling efficiency. The high roll surround was chosen to allow peak excursion whilst maintaining good cone area. In normal use the surround will not be moved to maximum limits, helping to improve longevity. The Indy A is designed to be used in a sealed enclosure and the product includes detailed plans for a suggested box project. The speaker must not be used in a free air or infinite baffle installation. The design of this woofer ensures compatibility with a huge range of amplifiers, even those where power ratings are many times that of the woofer. This is because we rate at true continuous power, whereas many amplifiers are rated at some kind of crazy “maximum” levels. True continuous power ratings! It's the future! In use, our woofer is incredibly forgiving and has the ability to handle high power bursts far greater than our listed burp power, providing that the power is clean. For keen enthusiasts looking for a lightweight and accurate sounding woofer the Indy A offers tremendous bandwidth, musicality and surprisingly good deep bass performance. It also has excellent detailed documentation making it easy to set up and use, as well as allowing the construction of more advanced enclosure projects. We firmly believe that this is one of the best subwoofers in its class - it's the entry level woofer that behaves like an expert!

Version History

Version History Indy A concept was designed to offer an all-round high performance woofer at a reasonable price point. The new engineering team drew up a wish list of specification points and made several prototypes before settling on the current basket, motor and cone layout. From there detail changes were made to almost every aspect of the basic design focussing on each detail. The Indy A branding was originally conceived in mid-2020, with outline specifications in place by the end of that year. Prototypes were built throughout late 2020 and first production models were made available Q3 2021

**Indy EVO10/2 10" 25cm 2x20hm DVC Deep Bass
Plus Subwoofer 1250w RMS (Sealed/Ported
Enclosures)**

Indy

World RRP: £197.95

Category: SUBWOOFERS

Product code: IndyEVO10/2

Product description

We literally started with a blank sheet of paper and engineered everything to offer the best possible reliability and performance. Many prototypes, re-designs and modifications were made and a tremendous amount of reliability testing was undertaken in order to ensure outstanding longevity. Using a custom designed flat wire coil and high specification Y38 magnets the Indy EVO is something very special, delivering performance way beyond expectation. The spiders are tuned to each exact model allowing us to develop for excellent excursion and power handling while implementing measures to prevent coil rub. The motor venting has been carefully designed to offer a good balance between noise reduction and cooling efficiency. The build of the woofer also incorporates some measures to add additional durability for extreme use. The high roll surround was chosen to allow to peak excursion while maintaining good cone area. In normal use the surround will not be put to its maximum limits - this helps to improve longevity. The added bead of glue above and below the coil helps to prevent separation of the coil when used in extreme situations. Oversized 4 AWG terminals make for easy installation and allow easy use of multiple cables to the one terminal when running multiple woofer configurations. Safe for use in almost any enclosure - bandpass, vented or sealed. Not for use in free air/infinite baffle configuration. For keen enthusiasts this woofer offers good musicality whilst maintaining great power handling and surprisingly good deep bass performance. Indy EVO is the ultimate iteration of the Swiss Army Knife subwoofer. We also offer recone kits for competition use.

Version History

Version History IndyEVO concept was designed using the IndyS as a base point to offer an all-round Extreme performance woofer at a reasonable price point. The new engineering team drew up a list of specification points and made several prototypes before settling on the current configuration. From there detail changes were made to every aspect of the basic design focussing on each detail. Performance was optimised to allow the woofer to run well in almost any enclosure. The Indy EVO branding was originally conceived in mid-2019, with outline specifications in place by the end of that year. Prototypes were built throughout 2020 and first production models were made available Q3, 2021.

Plus Subwoofer 750w RMS (Sealed/Ported
Enclosures)**

Indy

World RRP: £124.95

Category: SUBWOOFERS

Product code: IndyEVO8/2

Product description

We literally started with a blank sheet of paper and engineered everything to offer the best possible reliability and performance. Many prototypes, re-designs and modifications were made and a tremendous amount of reliability testing was undertaken in order to ensure outstanding longevity. Using a custom designed flat wire coil and high specification Y38 magnets the Indy EVO is something very special, delivering performance way beyond expectation. The spiders are tuned to each exact model allowing us to develop for excellent excursion and power handling while implementing measures to prevent coil rub. The motor venting has been carefully designed to offer a good balance between noise reduction and cooling efficiency. The build of the woofer also incorporates some measures to add additional durability for extreme use. The high roll surround was chosen to allow to peak excursion while maintaining good cone area. In normal use the surround will not be put to its maximum limits - this helps to improve longevity. The added bead of glue above and below the coil helps to prevent separation of the coil when used in extreme situations. Oversized 4 AWG terminals make for easy installation and allow easy use of multiple cables to the one terminal when running multiple woofer configurations. Safe for use in almost any enclosure - bandpass, vented or sealed. Not for use in free air/infinite baffle configuration. For keen enthusiasts this woofer offers good musicality whilst maintaining great power handling and surprisingly good deep bass performance. Indy EVO is the ultimate iteration of the Swiss Army Knife subwoofer. We also offer recone kits for competition use.

Version History

Version History IndyEVO concept was designed using the IndyS as a base point to offer an all-round Extreme performance woofer at a reasonable price point. The new engineering team drew up a list of specification points and made several prototypes before settling on the current configuration. From there detail changes were made to every aspect of the basic design focussing on each detail. Performance was optimised to allow the woofer to run well in almost any enclosure. The Indy EVO branding was originally conceived in mid-2019, with outline specifications in place by the end of that year. Prototypes were built throughout 2020 and first production models were made available Q3, 2021.

Product description

TOP PERFORMANCE & RELIABILITY We literally started with a blank sheet of paper and engineered everything to offer the best possible reliability and performance. Many prototypes, re-designs and modifications were made and a tremendous amount of reliability testing was undertaken in order to ensure outstanding longevity.

CUSTOM DESIGNED & ENGINEERED Using custom designed coils and spiders tuned to each exact model we were able to develop for excellent excursion and power handling while implementing measures to prevent coil rub. The motor venting has been carefully designed to offer a good balance between noise reduction and cooling efficiency.

FIRST CLASS BUILD & QUALITY CONTROL The build of the woofer also incorporates some measures to add additional durability for extreme use. The high roll surround was chosen to allow to peak excursion while maintaining good cone area. In normal use the surround will not be put to its maximum limits - this helps to improve longevity. The added bead of glue above and below the coil helps to prevent separation of the coil when used in extreme situations.

VERSATILE DESIGN & USE Oversized 4 AWG terminals make for easy installation and allow easy use of multiple cables to the one terminal when running multiple woofer configurations. Safe for use in almost any enclosure - bandpass, vented or sealed. Not for use in free air/infinite baffle configuration. For keen enthusiasts this woofer offers good musicality whilst maintaining great power handling and deep bass performance. Indy S is the Swiss Army Knife subwoofer. We also offer recone kits for competition use.

Version History

Version History Indy S concept was designed to offer an all round high performance woofer at a reasonable price point. The new engineering team drew up a wish list of specification points and made several prototypes before settling on the current basket, motor and cone layouts. From there detail changes were made to almost every aspect of the basic design focussing on each detail. Performance was optimised to allow the woofer to run well in almost any enclosure. The Indy S branding was originally conceived in mid 2019, with outline specifications in place by the end of that year. Prototypes were built throughout early 2020 and first production models were made available Q3 2021

**Indy CHP4/2 34mm Throat Diameter Plastic Horn -
70mm Depth (Single)**

Indy

World RRP: £9.95

Category: Tweeters & Horns

Product code: IndyCHP4/2

Product description

This is a less expensive alternative to the CHA4/4 model. Made from injection moulded plastic the sound performance is still excellent, but more care must be taken to ensure adequate support for the driver itself when using the CHP range.

**Indy TW/Four 40hm 2x120w RMS High SPL Slot
Type Tweeters (Pair)**

Indy

World RRP: £71.95

Category: Tweeters & Horns

Product code: IndyTW/Four

Product description

Taking over from the old XSPLT.1 slot tweeter this new, custom tooled driver has evolved into the ideal partner for large door builds and arrays. Featuring the ever popular european slot design for directionality and a powerful Y35 magnet, this driver has a wide response and will keep up in even demanding situations. Comes complete with a pair of capacitors to allow immediate connection to a full range source.

Version History

Version History Re-engineered from the outgoing XSPLT.1 model, launched Q2 2022 in Jiaxing.

**Indy TW/Three 40hm 120w RMS High SPL
Compression Type Tweeter (Single)**

Indy

World RRP: £41.95

Category: Tweeters & Horns

Product code: IndyTW/Three

Product description

Designed to be used with and optimised for use with our CHA aluminium horns this compression driver builds on the success we had with the SPLT.3 model. Featuring a Y35 magnet, extra wide frequency range and some neat push terminals this is a superb driver that can be used to create a powerful high frequency ensemble. Ships with an included adaptor to allow use of screw on type horns. (Does not include M5 thread screws required if adaptor plate will be used.)

Version History

Version History Re-engineered from the outgoing SPLT.3 model, launched Q2 2022 in Jiaxing.

**PWN8.2 75m Roll OFC 8AWG 8.4mm Black
Negative Cable 728 Strand**

World RRP: £212.95

Category: Wiring Products

Product code: PWN8.2

Product description

Our 100% pure OFC cables feature an extremely flexible and very durable protective sheath which make them a delight to work with compared to the normal stiff cables. The power cables have a very high strand count - 5929 strands for the 00AWG - 5250 strands for the 0AWG - 1862 Strands for the 4 AWG - 728 strands for the 8 AWG. The pictures speak for themselves; these are fantastic high current cables. See product downloads for current limitation information.

CON4.1 4AWG to 8/10AWG Amplifier Cable Terminator Connector x2

World RRP: £12.99

Category: Wiring Products

Product code: CON4.1

Product description

This pair of cable adaptors allow the easy and neat use of larger cable to maximise the potential power of your equipment. The machined flat surface helps to provide a good strong location for the grub screw to bite down on and to hold the adapter in position. Heavy duty solid metal and satin nickel finish with precision machined grub screws will ensure a long lasting reliable connection. This set measures 10mm across the inside lip for the cable insulation and 8mm diameter across the internal space for the cable itself. The diameter of the metal prong that fits into the amplifier is 4mm with the machined flat not taken into account. Effectively we class this as 4AWG to 10AWG. The section that extends into the appliance has a stepdown that can be cut down to accommodate an 8mm fitment.

PRCAYM.2 Quad Core Pure OFC Twist Shielded RCA Audio Y Lead Splitter 1M 2F

World RRP: £12.95

Category: Wiring Products

Product code: PRCAYM.2

Product description

Our PRCA.2 cables and interconnects represent the ultimate cable choice for the discerning mobile audiophile. Featuring 4 twisted cores of 10x0.12mm Pure OFC copper encased in a foil shield these offer transparent sound reproduction and great signal integrity. The cables are finished in a tough net braided overjacket for easy installation. Custom tooled metal RCA connectors with gold plated finish offer optimum clamping force and lossless conductivity.

**SPLBOX.2 40hm 2x100w RMS Waterproof
Outdoor Mini Box Speakers (White) Pair**

MARINE

World RRP: £48.95

Category: Waterproof Speakers

Product code: SPLBOX.2CLASSIC

Product description

The big brother of the SPLBOX.1 featuring a bigger mid woofer for extended mid bass response and a Mylar dome tweeter for absolute fidelity in the high frequencies. Finished in white to blend into marine or domestic applications, the SPLBOX.2 is just as happy out on the sea as it is in your kitchen or on your patio. Providing excellent audio performance in whatever application it may be utilised in. They can be mounted vertically or horizontally and have provision to be hung from a wall mounted hook. Also included are angle adjustable brackets, These speakers can also be acrylic painted to match any colour scheme. Please note that the speaker has a white painted metal grille which will need to be regularly maintained to ensure long term good looks. White in colour and rated to IP55.

Version History

Version History V1 - Project delivered on time and to specification. Excellent bass response and smooth midrange. No changes planned. New Model introduced Q3 2019 SPLBOX.2 with plastic grille. Reintroduced as SPLBOX.2CLASSIC for 2022 due to popular demand alongside the new version.

**SPLBOX.2P 40hm 2x100w RMS Waterproof
Outdoor Mini Box Speakers (White) Pair**

MARINE

World RRP: £49.95

Category: Waterproof Speakers

Product code: SPLBOX.2P

Product description

The big brother of the SPLBOX.1 featuring a bigger mid woofer for extended mid bass response and an improved dome tweeter for absolute fidelity in the high frequencies. Finished in white to blend into marine or domestic applications, the SPLBOX.2 is just as happy out on the sea as it is in your kitchen or on your patio. Providing excellent audio performance in whatever application it may be utilised in. They can be mounted vertically or horizontally and have provision to be hung from a wall mounted hook. Also included are angle adjustable brackets, These speakers can also be acrylic painted to match any colour scheme. This is the new model of the hugely popular SPLBOX.2 and is now made using a plastic grille to address the complaints about the level of maintenance required in an outdoor application with the metal grille provided on the old version. Now IP65 Rated, also.

Version History

Version History V1 - Project delivered on time and to specification. Excellent bass response and smooth midrange. No changes planned. This is the new model with plastic grille and separate logo badges.

SPLBOX.3W 80hm 2x150w RMS Waterproof Large Outdoor Box Speakers (White) Pair

MARINE

World RRP: £89.95

Category: Waterproof Speakers

Product code: SPLBOX.3W

Product description

The natural progression for the SPLBOX range of speakers was to go with larger speakers. The speaker performance will not be affected by a marine or outdoor environment and because of the larger form factor they offer excellent sound characteristics. With much more pronounced bass than their smaller counterparts. They offer themselves as an excellent full range outdoor speaker with higher output and better frequency response than other models in our range. These are fitted with a full 12db/octave 2 way crossover and a -3db attenuator switch for the tweeter. So you can adapt the sound to the application requirements. This crossover also increases the power handling and reduces distortion. Please note that the speaker has a white painted metal grille which will need to be regularly maintained to ensure long term good looks. White in colour and rated IP55.

**SPLBOX.4BL 40hm 2x50w RMS Waterproof
Outdoor Mini Box Speakers (Blue) Pair**

MARINE

World RRP: £32.95

Category: Waterproof Speakers

Product code: SPLBOX.4BL

Product description

SPLBOX.4 is our latest and most exciting box speaker. Rated to IP65 level of waterproof and moulded in a range of colours and with ABS composite integrated grilles, brackets and accessories these are the easiest to maintain outdoor compatible speakers that we sell. Sound quality is excellent considering the small enclosure size with a warm, rich sound and detailed highs from the metal tweeter domes. These can be installed in vehicles, buildings, boats, gazebos, sheds - you name it - and all with a splash of colour! Please note that if the units are to be installed outdoors it will be necessary to periodically apply a UV protective spray to the coloured surfaces to prevent sun bleaching. Fading due to sun damage is not covered under the limited warranty. Blue in colour.

Version History

Version History SPLBOX.4 was designed and built in response to requirements from our international markets for an exciting and stylish addition to the range that offered excellent outdoor weatherproofing. V1 - Launched in mid Q3 2017 the range of .4 boxes sound great and answer the difficult question of user maintenance when considering outdoor speakers by throwing away as much metal as possible and replacing it with ABS moulded parts.

BFTDJ.1L DJ Style Tee Shirt Large Size

***SUPPORT
CREW***

World RRP: £22.95

Category: Promotional Items

Product code: BFDJT.1L

Product description

This is a high quality cotton T-shirt with DJ Style Bassface logo on the chest and XPL series woofer on the rear. See image for detail size guide.

Version History

Version History Sample products were printed in the UK using Fruit Of The Loom garments and proved to be hardwearing. It was felt that the design was too obvious, however, and the clothes were never put into serial production pending design of a new line up. Our Italian partners contracted a company in Italy in Q4 2016 to pen a new range of promotional clothes and exciting sample drawings were seen Q1 2017. V1 - Finally in Q3 2018 these fantastic production garments were received from Italy. With typical Italian cool these are 100% wearable away from the judging lane as casual wear and look really smart

SPL8M.1A Aluminium Bullet Phase Plugs With Threaded Mounts

***SUPPORT
CREW***

World RRP: £9.95

Category: Spare Parts

Product code: SPL8M.1A

Product description

These bullet phase plugs can be used for custom development of speaker projects. They provide the speaker with better heat dissipation and marginally smoother response. The chief benefit is in extended service time under extreme load. The bullets themselves are individually machined from a solid piece of aluminium and are precision pieces and have a metric thread for integration into your project.

Version History

Version History V1 Aluminum phase plug was produced in volume to increase heat dissipation of the woofer.

World RRP: £71.95

Category: Spare Parts

Product code: DB1.1XPCBA

Product description

Bassface is proud to announce that it will now ship replacement PCB units for its amplifiers to help customers repair and renew existing equipment. Ideal for competitors trying to keep costs down after pushing beyond limits or for more traditional repairs. With the cost of raw materials increasing every year it does not make economic sense for business to encourage customers to throw away perfectly good cast and machined components. Please note that it is extremely important to understand the immense heat that this board will generate if it is not installed into its correct heatsink. YOU CAN NOT RUN THIS BOARD WITHOUT THE CORRECT ORIGINAL BASSFACE HEAT SINK. If you attempt to use this product without installing it into the heat sink the product will immediately destroy itself.

Version History

Version History No prototype necessary. Straight iteration of existing product. Compatible with DB1.1 and DB1.1X from 2020 build dates and up.

Amplifier Data

Genuine Useable RMS Power, 40hm (Watts), < 1%THD, 14v	210x1
---	-------

Genuine Useable RMS Power, 20hm (Watts), < 1%THD, 14v	280x1
Genuine Useable RMS Power, 10hm (Watts), < 1%THD, 14v	500x1
Frequency Response (Hz)	30-200
Signal To Noise Ratio (db)	76
LPF (Hz)	40>180
Bass Boost (Db)	0>12
Boost Frequency (Hz)	30>80
Subsonic Filter (Hz)	0>50
Audio Signal Input Voltage (V)	0.2>5
LPF Slope (Db/Oct)	12
Subsonic Filter Slope (Db/Oct)	12
Amplifier Topology	Class D
Fuse Rating (Amps)	Unfused
Power Wire Input Gauge (AWG)	8
Minimum Recommend Final Load Per Channel (Ohms)	1 Mono
Input Impedance (KOhms)	100

Technical Highlights

- Complete Replacement PCB Assembly
- Class D Technology - Maximum Power
- High Quality RCA Connectors
- Heavy Duty Screw Terminals
- Printed Instruction Manual & Data Sheet
- 5V Stable RCA Inputs
- Variable Subsonic Filter
- Variable Low Pass Crossover
- 1 Ohm Stable Operation
- Line Output For Daisy Chain Amplifier Applications
- http://incarnav.co.uk/Bassface/DB1.1PCBA_2.png

What's In The Box?

- 1 x High Performance Mono Amplifier Populated PCB

World RRP: £390.95

Category: Spare Parts

Product code: XPL15.1SPLRC

Product description

Bassface XPLSPL15.1 0.7+0.7 Ohm DVC Recone Kit. Does not include tools or workshop consumables such as glue. Note that this does NOT include the dustcap which is available as separate part number XDC.1.

Version History

Version History New generation spare parts to reduce the cost of running a system at a high level. Bassface is moving towards a policy of producing back up equipment to help customers maintain equipment. This will be a long process but these spares prove our intent to create a cohesive and supported brand. Delivered Q1 2019. September 2023 there are only 2 remaining recone kits for XPL15 SPL left in stock in the UK. Once these are gone these amazing woofers will be unsupported.

SDC.3 Paper Subwoofer Dust Cap Upgrade 6" 15cm

World RRP: £8.95

Category: Spare Parts

Product code: SDC.3

Product description

At Bassface we believe in the individual, we believe in outdoing expectations and we believe in progression. Because of this we have developed a number of “upgrades” for our products, for you to customise and improve your gear. The SDC.3 is a lightweight paper dustup measuring around 6 inches in diameter. It is very lightweight. Its a great fit on the SPL15.1, SPL12.2, SPL15.2, SPL12.3, SPL15.3, SPL12.4 and SPL15.4 subwoofers. This enables you to quite quickly and easily upgrade the performance of your existing Bassface set up. These can actually be used on any suitable speaker when reconing or to repair damage.

SPL10.3SRC 10" 25cm Subwoofer Recone Kit

2x20hm DVC

World RRP: £31.95

Category: Spare Parts

Product code: SPL10.3.2SRC

Product description

Complete high quality recone kit for the 10.3S series Bassface woofer. Comes complete with carbon fibre dustcap Note that the kit does not come with adhesive. This kit can be used to upgrade a 10.3 to S specification. 2+20hm version.

Key Facts

Product Category	Spare Parts
Version	1
Series	Support Crew
First Added	43338
Last Modified	43437
Barcode	680044771847
Production Status	Current
Product Net Weight (g) (For Pairs/Sets/Major Parts)	800
Complete Product Pack Weight (g)	1200
Warranty (Months) - Private Enjoyment Use Only	12
Sold As	Single

Speaker Data

Impedance (Ohm) (Nominal)	2+2
Voice Coil External Diameter (mm)	65

Technical Highlights

- Provision of replacement parts reduces system running costs
- Replacing parts is more environmentally friendly
- Bassface is committed to product support

What's In The Box?

- 1 x Recone Kit
- 1 x Carbon Fibre Dustcap
- http://incarnav.co.uk/Bassface/SPL10.3.2SRC_1.png

SPL10.3SRC 10" 25cm Subwoofer Recone Kit

2x40hm DVC

World RRP: £31.95

Category: Spare Parts

Product code: SPL10.3.4SRC

Product description

Complete high quality recone kit for the 10.3S series Bassface woofer. Comes complete with carbon fibre dustcap Note that the kit does not come with adhesive. This kit can be used to upgrade a 10.3 to S specification. 4+4Ohm version.

SR10.1 10" 25cm Subwoofer Trim Ring For SPL10.1

***SUPPORT
CREW***

World RRP: £15.95

Category: Spare Parts

Product code: SR10.1

Product description

Speaker Trim ring for the SPL10.1. This enables you to give your install the professional touch. Fits perfectly for the SPL10.1

Key Facts

Product Category	Spare Parts
Version	1
Series	Support Crew
First Added	42667
Last Modified	42907

Team SQC.1 Extreme Sound Quality Passive Three Way Crossover Networks (1Khz / 5Khz) Pair

Team

World RRP: £99.95

Category: ACCESSORIES

Product code: TeamSQC.1

Product description

Absolutely ideal to head up a three way system using our SQ drivers. Tweeter attenuation is by means of an onboard switch, with a 0 and -3dB level. The three outputs are for woofer, midrange and tweeter with a 12dB/Octave slope and crossover points at 1Khz and 5Khz. The SQC.1 crossover has been designed to offer excellent integration between our SQ series 6.5 midwoofer, the 4 inch midrange and the SQ tweeter, though, of course it can be used on any similar installation.

Version History

Version History Designed from 2020 until 2021 by our UK audiophile these speakers were a lot of work and many prototypes to get exactly right. Launched to market Q4 2021.

Key Facts

**Team 15000/x1D Class D Monoblock Subwoofer
Amplifier 15000w RMS**

Team

World RRP: £1258.95

Category: AMPLIFIERS

Product code: Team15000/x1D

Product description

These are no details spared high performance amplifiers using transformer class technology allowing for a compact design while offering huge power. Featuring a sleek satin finish the new Team Series delivers ultimate performance in an unbelievably compact package. Do not let the size of these amplifiers fool you – the current requirements for this level of output are considerable. Installation using the exactly correct cables, batteries and alternator is essential. The amplifiers offer wide crossover adjustments and will accommodate high power RCA and main voltage input. Top quality RCA terminals, power connections and speaker terminal blocks are standard, as is individual factory burn in per amplifier and QC stamp with serial number. The amplifiers are supplied in high quality packaging for protection, and come with printed instructions and comprehensive data sheets as well as having additional important information printed on the body of the units. Finally, output power is rated correctly - what you read is what you get - the Team Series offers stellar performance at an affordable price. This is a professional product, for running subwoofers. The installation must be carried out by expert system architects. WARNING: The current requirements/power of this amplifier are/is extreme.

Version History

Version History 24-4-23 - Corrected an error in the online information and printed datasheet that incorrectly stated the frequency range as Full range. This is a mono LPF amplifier.

**Team XPL10/4 10" 25cm 40hm 400w RMS
Professional Grade High Output Component
Midrange Speaker**

Team

World RRP: £77.95

Category: Midbass & Midrange Speakers

Product code: TeamXPL10/4

Product description

XPL midrange drivers have big power but at the same time a butter smooth and almost perfectly linear response right up to the point at which you would allow other speakers to take over where their on axis performance trails off. In the region up to around 1Khz they are absolutely unbeatable and offer amazing detail and sonic quality. Power handling is tremendous due to the top of the range Y35 magnet and generously sized motor. VC gap is pinned at a modest setting allowing for big power with a little latitude on coil rub due to abuse but the speaker is not designed for beginners.

Version History

Version History Designed by our Far East engineering team and QC checked in Italy. Launched Q2 2023 to immediate sell out situation.

Sound Quality Full Range Speaker**

Team

World RRP: £99.95

Category: Midbass & Midrange Speakers

Product code: TeamSQ4/4

Product description

The SQ woofers are ideal for building ultimate sound quality full range systems. Featuring cast baskets and high end components and construction throughout these speakers would be many times the price in competitor brands. We don't charge for performance, so the value on offer here is staggering. Running from any source these are incredibly efficient speakers and have a musical quality that will startle you with its stereo imaging and beautiful open vocals. The high frequency performance is absolutely outstanding, and they are actually listenable even without tweeters! Midrange, it almost goes without saying, is the best we offer and the midbass performance is valiant for a tiny driver, beginning to roll off smoothly at 200Hz and hanging on to 120Hz if you don't need an enormous sound. It is absolutely possible to use a pair of these with a subwoofer to create a very small form factor, very high performance system.

Version History

Version History Designed from 2020 until 2021 by our UK audiophile these speakers were a lot of work and many prototypes to get exactly right. Launched to market Q4 2021.

**Team SQ6/4 6.5" 16.5cm 40hm 75w RMS Ultimate
Sound Quality Woofer/Midrange Speaker**

Team

World RRP: £149.95

Category: Midbass & Midrange Speakers

Product code: TeamSQ6/4

Product description

The SQ woofers are ideal for building ultimate sound quality full range systems. Featuring cast baskets and high end components and construction throughout these speakers would be many times the price in competitor brands. We don't charge for performance, so the value on offer here is staggering. Running from any source these are incredibly efficient speakers and have a musical quality that will startle you with its stereo imaging and beautiful open vocals. The speakers have a commanding midbass response and a very exciting, accurate and clear full range sound. The speakers play convincingly down to 60Hz if modest sound levels are required, and can be used without a subwoofer if so needed, still retaining impressive performance. They should be crossed over to a high frequency speaker by 6Khz if you are using them as a two way system.

**Team ZXM10/4 10" 25cm 40hm 500w RMS High
SPL Neodymium Midrange / Midbass Speaker**

Team

World RRP: £178.95

Category: Midbass & Midrange Speakers

Product code: TeamZXM10/4

Product description

Developed to offer elite level performance. Using carefully designed custom heavy duty cloth spiders tuned to each exact size we were able to develop for excellent reliability and performance while implementing measures to optimise the frequency response. The ultra-light weight copper coated coil allows for more sonic accuracy and high-end musical characteristics. We use a small piece Neodymium motor to optimise the cooling efficiency and motor strength. Team ZXM also features a dual roll treated cloth surround and coated dimpled textured surface to the cone. Great for small or large door builds in car, for keen enthusiasts looking for a lightweight and accurate sounding speaker the Team ZXM offers good bandwidth and musicality in the midrange. It also has proper documentation making it easy to set up and use even in more advanced projects.

Version History

Version History Team ZXM concept was designed to offer an all-round ultra high performance combine midrange/midbass device at a reasonable price point. ZXM branding was originally conceived in mid-2019, with outline specifications in place by the end of that year. Prototypes were built throughout 2020 and first production models were made available Q3 2021. ZXM midrange is due to be discontinued in Q4 2023, to be replaced by the XPL and revised SPL range of mids.

**Team 5000/1D Class D 2/1 Channel Mono
Subwoofer Power Amplifier Replacement PCB**

Team

World RRP: £209.95

Category: Spare Parts

Product code: Team5000/1DPCBA

Product description

Bassface is proud to announce that it will now ship replacement PCB units for its amplifiers to help customers repair and renew existing equipment. Ideal for competitors trying to keep costs down after pushing beyond limits or for more traditional repairs. With the cost of raw materials increasing every year it does not make economic sense for business to encourage customers to throw away perfectly good cast and machined components. Please note that it is extremely important to understand the immense heat that this board will generate if it is not installed into its correct heatsink. **YOU CAN NOT RUN THIS BOARD WITHOUT THE CORRECT ORIGINAL BASSFACE HEAT SINK.** If you attempt to use this product without installing it into the heat sink the product will immediately destroy itself.

Version History

Version History No prototype necessary. Straight iteration of existing product.

**Team SQT.1 40hm 2x45w RMS Ultimate Sound
Quality Silk Dome Tweeters (Pair)**

Team

World RRP: £99.95

Category: Tweeters & Horns

Product code: TeamSQT.1

Product description

Introducing the SQT.1 tweeter. The product of intense development and testing here in the UK, this simply astonishing silk dome tweeter produces fine quality high frequencies and is the ideal partner for our SQ mid range drivers. You will not find finer sound at any price. Please note these SQ tweeters require a burn in period of at least 25 hours modest volume play to sound their very best.

Version History

Version History Designed from the ground up during 2020, and launched in Q2 2022. There is an error in the Datasheet provided with the item which states that the product includes a pair of capacitors. This is incorrect and the user should provide their own crossover.

**Team TW/NeoOne 40hm 2x120w RMS Sound
Quality Neodymium Bullet Tweeters (Pair)**

Team

World RRP: £65.95

Category: Tweeters & Horns

Product code: TeamTW/NeoOne

Product description

The old Neo One was a big hit and this new and optimised version is sure to be even better. Balanced sound, smooth highs and compact size allow perfect positioning within the system and a super sensitive response (110db) ensures spectacular imaging. Comes complete with a pair of capacitors to allow immediate connection to a full range source.

Version History

Version History Re-engineered from the outgoing Neo One model, launched Q2 2022 in Jiaxing. Denoted as V2.

VOLT/0 0AWG (53mm) 150A ANL Fused Prewired & Crimped 5m Super Flexible Amplifier Wiring Kit (30%OFC/2989 Strand)

World RRP: £73.95

Category: Wiring Products

Product code: Volt/0

Product description

Our carefully designed and engineered wiring kits offer the enthusiast an easy way to lay on high performance power. The 30% OFC/CCA blend provides significantly improved power transfer and current handling compared to traditional CCA kits, whilst keeping the cost managable. A high quality ANL fuse holder and 150A fuse are pre fitted and both the main power input and the earth point cables have their respective terminals factory installed, saving the need for expensive crimping tools. A high quality 5m RCA cable, 5m of 12GA (3.2mm) speaker cable and ancilliary remote cable etc are also included along with the top quality super flexible silicone power cables. You won't find higher real world performance, better value or an easier to install kit anywhere. These are not to be confused with those "cheap charlie" marketplace wiring kits that claim unfeasible wattages. We supply a fuse helpful for many installations but this can and should be replaced with a more appropriate value to your install if necessary with reference to our cable chart. This chart is provided so that you can understand how current and wattage capacity changes as you alter the power cable length. Never install a fuse that would exceed the current handling of the fuseholder.

**VOLT/8 8AWG (8.3mm) 80A Mini-ANL Fused
Prewired & Crimped 5m Super Flexible Amplifier
Wiring Kit (30%OFC/469 Strand)**

World RRP: £27.95

Category: Wiring Products

Product code: Volt/8

Product description

Our carefully designed and engineered wiring kits offer the enthusiast an easy way to lay on high performance power. The 30% OFC/CCA blend provides significantly improved power transfer and current handling compared to traditional CCA kits, whilst keeping the cost managable. A high quality mini ANL fuse holder and 80A fuse are pre fitted and both the main power input and the earth point cables have their respective terminals factory installed, saving the need for expensive crimping tools. A high quality 5m RCA cable, 5m of 16GA (1.5mm) speaker cable and ancilliary remote cable etc are also included along with the top quality super flexible silicone power cables. You won't find higher real world performance, better value or an easier to install kit anywhere. These are not to be confused with those "cheap charlie" marketplace wiring kits that claim unfeasible wattages. We supply a fuse helpful for many installations but this can and should be replaced with a more appropriate value to your install if necessary with reference to our cable chart. This chart is provided so that you can understand how current and wattage capacity changes as you alter the power cable length. Never install a fuse that would exceed the current handling of the fuseholder.

Key Facts

Product Category	Wiring Products
Version	1
Series	Volt
First Added	44590
Last Modified	45295
Barcode	5060905110940
Production Status	Current
Product Net Weight (g) (For Pairs/Sets/Major Parts)	700
Complete Product Pack Weight (g)	791
Operating Temperature (Degrees Celsius)	0-50
Warranty (Months) - Private Enjoyment Use Only	12
Sold As	Kit

Technical Highlights

- True 8 AWG Cable 469 Strand With 100A Mini ANL Fuse
- Flexibile Silicon Rubber Over 8.29mm Conductor Area
- 30% OFC / 70% CCA Blend
- Pre Assembled & Crimped - Easy Fit
- Complete With 5m RCA & 5m Speaker Cable

What's In The Box?

- 1 x 5m 8 AWG Orange Power Cable With 80A Fuse Holder & Round Terminal Installed
- 1 x 1m 8 AWG Black Ground Cable, Round Terminal Pre-Crimped
- 1 x 5m 16 AWG Orange/Black Speaker Cable
- 1 x 5m 18 AWG Remote Cable
- 1 x 5m Shielded & Twisted RCA Cable, SureGrip Connectors
- 2 x 8 AWG Spade Terminal, Orange/Black Sheath
